Projects

IoT-Based Smart Irrigation System

Aug 2025 - Present

technologies used : ESP32, IoT, Soil Moisture Sensor, Cloud Platform

- Designed and implemented an IoT-enabled smart irrigation system that automatically controls water flow based on real-time soil moisture levels.
- Integrated soil moisture sensors with ESP32 to trigger pumps and solenoid valves using threshold-based control logic.
- Enabled cloud-based monitoring for real-time data visualization, remote access, and manual irrigation override to improve water efficiency.

Internship

Full Stack Developer Intern - TAP Academy

Jan 2026 - Pursuing

Java, Spring Boot, Hibernate, MySQL, React, REST APIs

- Developed and deployed full-stack applications using Java, Spring Boot, Hibernate, MySQL, React, and REST APIs following clean and scalable architecture.
- Built backend modules with Spring Boot, implemented secure authentication, and optimized API performance.
- Designed responsive React components, improved page load speed, and enhanced overall user experience.

Certifications

- Participated in 24-hour National Level Hackathon (ADVAYA 2K25), built and presented a working software prototype demonstrating problem-solving and teamwork skills.
- Participated in Tech Bytes Quiz by TCS, showcasing strong technical aptitude, logical reasoning, and IT fundamentals.
- Completed Introduction to Cyber Security Certification, gaining hands-on understanding of security principles, threats, and best practices.
- Developed two full-stack web applications using HTML, CSS, JavaScript, PHP, and MySQL with responsive UI and backend logic.
- Served as an NSS Volunteer, actively participating in community service initiatives and demonstrating leadership and social responsibility.
